Scrub Oak/Sandhill Restoration Project

Sponsored by the PEAR Association INC.
2003-2009

This 50 acre site of formally agricultural land has been restored with Central Florida Native Plants and Seed typical of the Threatened Oak Scrub and Sandhill habitats. It will provide sanctuary for Florida Scrub Jays, Gopher Tortoises, and the many plants and animals associated with these species and habitats.

MAJOR CONTRIBUTORS

Florida Communities Trust	DEP - Division of State Lands
Boy Scouts of America: Eagle Projects	Florida Native Plant Society
Central Florida Woman's Club	Lake County Water Authority
Low's Home Improvement Warehouse	U.S. Fish and Wildlife Service
Florida Wildflower Foundation	National Tree Trust
Lake County Board of County Commissioners	
Volunteers of PEAR Association INC.	

Palatka Environmental and Agricultural Reserve
Native Plant Demonstration Gardens and Pavilion

This garden contains plants native to Lake County Florida. The plots include plants from scrub/sandhill ecosystems, as well as plants that are key nectar and host plants for butterflies, and food sources for birds.
